

Mobile rack

1342/A2

Mobile rack combinations for lower body table shields (types 311 & 312), removable top shields & head end shields (types 313)

A mobile rack that is available in two configurations as shown below. It's ideal for use in departments where space for wall storage racks is restricted or unsuitable. It occupies a small floor area (61 cm x 67 cm) when shields are parked and folded and has large lockable castors which include front guards to push aside any floor cables. Its heavy, easy rolling base safeguards against toppling even when fully loaded.

1342/A2/E
